### Design and Construction Features

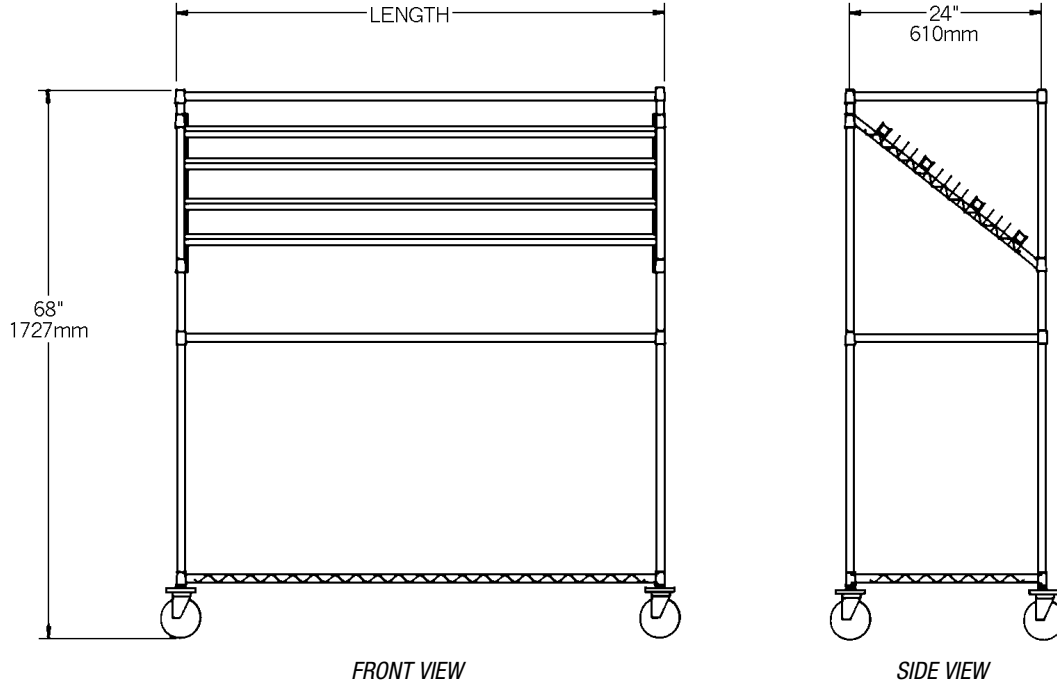

- Sterile Wrap Carts provide a safe and convenient place to hang or store wraps. Most wraps can be hung so that all sizes can be seen or removed at one time. The bottom wire shelf, standard on all units, can be used to hold extra or odd size wraps.
- Carrier assembly, which supports the bars, is adjustable in 1" (25mm) increments along the height of the posts so that it can be positioned at a comfortable level for users, whether seated or standing. The four bars can also be positioned in any of 18 slots along the carrier assembly.
- All models come standard with four square horizontal bars; additional bars can be added as accessories if needed.
- 5" (127mm) swivel casters provide easy maneuverability.
- Available in two lengths: 48" and 60" (1219 and 1524mm). The 60" (1219mm) models will hold wrap up to 54" x 72" (1372 x 1829mm).
- All models are 68" (1727mm) in overall height.
- Units have four 1" (25mm)-diameter posts with grooves numbered in 1" (25mm) increments to ensure fast and level assembly and adjustment.
- 5" (127mm) swivel chrome-plated with polyurethane tread.
- Chrome-plated bottom wire shelf.
- 3-sided chrome-plated top and intermediate channel frames.
- 1" (25mm) chrome-plated support bars.
